Yellow Mini Sigma filter element 2” 100 microns | AMIAD

The Mini Sigma filter element is a replacement part for the Mini Sigma polymeric filter. It is strong and durable and provides optimal water filtration for your irrigation system.

Drip Tape x Insert Barb - Shut Off Valve

Shut Off Valve with twist lock drip tape and insert barb for punch on polyethylene pipe

COMPLETE LINE OF PIPES AND FITTINGS FOR IRRIGATION SYSTEMS

Complete line of irrigation pipes and hoses (PVC, HDPE, aluminum, drip tape, flexible irrigation hoses and a vast number of fittings for irrigation systems) made of aluminum, steel, Schedule 40 & 80 PVC, CamLock and compression pipes and hoses...

- **Drip Irrigation Fittings**
- **Hose Irrigation Fittings**
- **Aluminum Fittings**
- **Steel Fittings and Camlock**
- **PVC Fittings**
- **PVC Fittings Schedule 40 Insertion**
- **Pipes and Hoses**

DRAMM ColorStorm Premium Rubber Hose - 50 foot

All DRAMM brand products are designed for seasonal use when maintaining your garden.

2.0 GPH XERI-BUG Emitter, Red (BARB X BARB)

2.0 GPH XERI-BUG Emitter, Red (BARB X BARB) for irrigation pipe

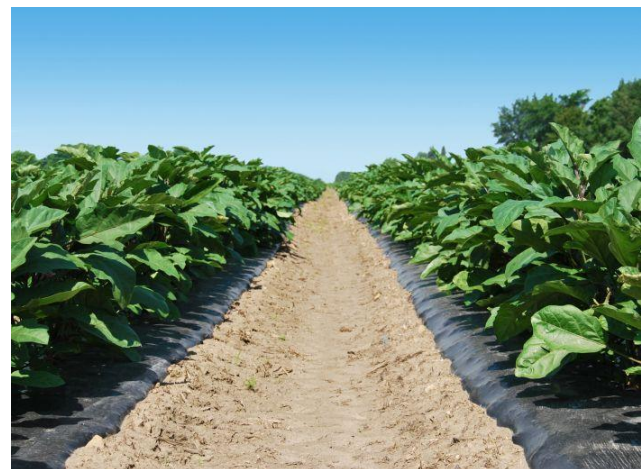

PLASTICULTURE

Plastic mulch films, Bio360 Biodegradable mulch film or photodegradable plastic mulch films available in several colours and thicknesses. Low tunnels perfect for crops requiring a warmer climate.

- **Soil Biodegradable & Compostable Mulch Films**
- **Black Plastic Mulch Films**
- **Photodegradable Mulch Films**
- **Clear Plastic Mulch Films**
- **Color Plastic Mulch Films**
- **Low Tunnels**
- **Occultation Tarp**
- **Greenhouse Film**

Soil Biodegradable & Compostable Black Mulch Film - Bio360

The Compostable & Soil Biodegradable Bio360 Mulch Film, made of Mater-Bi, a corn starch based raw material, is compostable and soil biodegradable. The master batch pigment mixture used for coloring is also made of Mater-Bi. It leaves no toxic residues in the ground, and you save on removal, recycling, and land fill costs.

Grey on Black Soil Biodegradable and Compostable Mulch Film – BIO360

Grey on Black mulch film, soil biodegradable and compostable is perfect for heat loving crops like tomato, pepper, squash, eggplant, watermelon, etc.

The Compostable & Soil Biodegradable Bio360 Mulch Film, made of Mater-Bi, a corn starch based raw material, is compostable and soil biodegradable. The master batch pigment mixture used for coloring is also made of Mater-Bi. It leaves no toxic residues in the ground, and you save on removal, recycling, and land fill costs. Find more info on its official website.

Protection / WINTER COVERS

Protect your crops from cold winter weather and frost with these different winter covers including Agryl, Novagryl, Novagryl Plus and Hibertex Pro.

- **Floating Row Covers**
- **Perforated Covers**
- **Hibertex Covers**
- **Bags | Supports | Thermometers**
- **Hoops and Anchoring Pins**
- **Ground covers**

Floating row cover | AGRYL P-17

The Agryl P-17 floating row cover is a non-woven cover without reinforced edges of very good quality, which creates a microclimate favorable to the growth. Its operation is simple, it is by increasing the temperature and by preserving the humidity of the soil that it allows the plants to grow more quickly. It thus offers very effective crop protection against cold and frost.

- Possible applications
- Fields
- Tunnels and greenhouses (in spring and fall only to avoid overheating the crops in the middle of summer).

Note that the Dubois Agrinovation team strongly recommends the use of hoops to protect plants. By using hoops, you avoid smothering and causing stress to your crops and will help them grow.

Floating row cover | NOVAGRYL P-19

Due to the higher size of certain products, a request for shipping quote must be completed. You must add the item to your cart and confirm the quote request. Once calculated, we will send you the quote including the shipping costs.

Novagryl is a floating row cover composed of 3 superimposed layers of non-woven fibres and is perfectly uniform. It provides the best thermal effect in the world for a crop protection against cold weather.

NETS, TRELLIS AND FENCES

ProtekNet bird and insect exclusion nettings and shade nets are perfect to protect crops against pests and adverse weather.

- [Deer Fences](#)

Exclusion Insect Netting - Knitted - 17g or 25 gr | ProtekNet

The ProtekNet 25gr insect net offers a complete crop protection against insects. The 25g mesh is the most popular solution against most insects and is suitable for all types of production. Very versatile, it can be used in the field, large tunnels, or greenhouses. The net can be installed directly on the plants or hoops for better results. Many size options and mesh sizes are available in 47g, 60g and 70g. Please see the brochure tab for recommendations for different insects.

These nets are non-tearable and have a narrow opening. Unlike woven netting, knitted insect exclusion netting does not fray when cut and if torn, can be sewn. ProtekNet nets are flexible, easy to install and don't necessarily require the use of hoops. Compared to regular woven netting, they are more permeable and provide optimal light to crops.

Proteknet Green Bird Control Netting - 40 gr

The ProtekNet green high density polyethylene bird control net 40gr is the most effective bird control netting on the market for crop protection.

For the choice of the length and width of the nets, an additional 10% must be calculated to compensate for the following factors: the sides of the nets held on the ground, installation on hoops or structures, the unevenness of the ground, and wave effect between the plants.

MACHINERY AND EQUIPMENT

Complete equipment for plasticulture, low tunnels, biodegradable/plastic mulch films, and floating row covers such as bedders, layers, transplanters, lifters, hole punchers, and seed planters.

- **Plastic Mulch Layer**
- **Floating Row Cover Layer/Remover**
- **Low Tunnel Layers**
- **Mulch Film Hole Punchers**
- **Plastic Mulch Lifters**
- **Transplanters**
- **Seed Planters**

Clean seeder JP-1 | JANG AUTOMATION

The manual seeder accurately and quickly sows every small and large seed with easily interchangeable rollers, saving you both time and money. The seeder creates precise spacing between rows, making it an indispensable tool for farmers and gardeners who want to improve their productivity.

The multitude of rollers that can be fitted onto the seeder will allow you to find an ideal adjustment according to the size of your seeds.

Two Bad Cats Infinite Dibbler

The frame kit (handle + metal frame) and at least two wheels are required to assemble the Two Bad Cats Infinite Dibbler. Sold separately.

BASKETS, CRATES AND BINS

Acquire harvest plastic containers, picking baskets or growing containers suitable for your fruits and vegetables. Safe, long-lasting and eco-friendly, plastic containers will help you save on maintenance costs, space, and storage.

Plastic liner for bins | 100 units

The clear plastic liners bags are used on plastic/wood bins to preserve food moisture content during the transport.

Fruit & Vegetable Harvest Lugs

Multi-purpose fruit & vegetable plastic harvest lugs made for harvesting, processing, packing, and distribution of fruits and vegetables.

- Plastic Harvest Lugs can be stacked or nested for space efficiency.
- Vented sides and bottom for optimum cooling and drainage
- Crop suggestions: Asparagus, Bell peppers, Leaks, Tomatoes...

MANUAL TOOLS

Manual tools are designed to weed and maintain plants in an eco-friendly manner.

- **Opinel Knives**
- **Battery Powered Pruning Shears**
- **Manual Pruning Shears**
- **Manual Tools**

Barnel pruning shears model V3000.

The Barnel Model V3000 pruning shears can be used for horticulture, landscaping, agriculture, gardening, ornamental plant cultivation and viticulture.

Ideal for cutting flowers. The sharper blades make it easier to cut flowers. The V3000 precision pruning shears have double polished 40mm carbon steel blades. The handles are made of sturdy steel covered with a soft plastic.

Electric Pruning Shears | FELCO 812

The Electric Pruner Kit - FELCO 812 is a faster generation of pruners for precise and efficient work. The ergonomic design and balance of this tool will make every work day a breeze. Maximum cutting diameter of 35 mm / 1.4 in.

*Battery life may vary slightly depending on temperature
